

Abdalrhman M. Alkady

Software Engineer

☎ +201069683986 ✉ alkady2019@gmail.com 🌐 alkady22 🔄 Phoenix-H22

Summary

Software Engineer building production web systems across SaaS, commerce, ERP, payments, integrations, and connected products. Strong in Laravel/PHP and Node.js, with hands-on frontend work using React, Vue.js, Livewire, Blade, and Filament. Experienced across requirement analysis, API and data design, implementation, testing, deployment, monitoring, and production support. Recent work includes a multi-merchant platform supporting 200 registered merchants and an average of 20K monthly orders, plus ERP workflows serving 2,000 active employees.

Skills

Data & Infrastructure

MySQL · PostgreSQL · Redis · Query Optimization · Docker · Linux · Nginx · Supervisor · CI/CD · GitHub Actions

Backend & Architecture

REST APIs · Webhooks · Queues / Background Jobs · Multi-Tenant Architecture · System Design · OOP · SOLID · API Integrations

Full-Stack Engineering

Laravel · PHP · Node.js · Express.js · React.js · Vue.js · Livewire · Blade · Filament · JavaScript

Additional

Python · MQTT · Raspberry Pi · Technical Documentation · Requirements Analysis

Professional Experience

Software Engineer

Kayanac ERP (Earlier engagement: Mar 2025 – Jun 2025 · Contract) ✉

Aug 2026 – Present
Zagazig, Egypt

- Rejoined full-time to continue ERP development across HR, payroll, CRM, attendance, transportation, and notifications.
- Delivered six integrated modules for **2,000 employees**, including biometric attendance, helping cut operational errors by approximately **60%**.

Software Engineer

Theqah.sa (Earlier engagement: Aug 2024 – Feb 2025) ✉

Sep 2025 – Jun 2026
Riyadh, Saudi Arabia

- Shipped **Smart Lockers, Wasfaty, AI Photo Station, and vending products** across Laravel, Python, MQTT, and Raspberry Pi.
- Built the Smart Lockers control plane and Hajj-season dispensing workflows with secure APIs, queues, retries, diagnostics, and recovery.

Backend Software Engineer

Mohssilh - محصلة ✉

Mar 2025 – Apr 2026
Saudi Arabia

- Scaled a multi-merchant backend serving **200 merchants, 20K monthly orders**, and approximately **SAR 12M** in 2–3 months.
- Reduced webhook failures to **near zero** and maintained **three months of zero downtime** with stronger sync, queue, and reconciliation tooling.

Software Engineer (Contract)

Tjar.sa (Multi-Tenant E-Commerce SaaS) ✉

Mar 2024 – May 2024
Saudi Arabia

- Built tenant-aware Laravel/Livewire features for stores, orders, inventory, payments, and merchant workflows.
- Delivered responsive Tailwind interfaces with data isolation, integrations, validation, and production fixes.

Software Engineer (Contract)

KLLIQ LLC (AI SaaS Solutions) [🔗](#)

Sep 2023 – Mar 2024

Khamis Mushait,

Saudi Arabia

- Built SaaS and AI-enabled features with Laravel, Vue.js, Python, relational databases, and third-party APIs.
- Improved legacy areas through API work, debugging, refactoring, frontend fixes, and scoped remote releases.

Projects

NABD — Messaging Automation Platform [🔗](#)

Laravel, Node.js, Express.js, Baileys, Redis, MySQL, Supervisor, Salla/Zid APIs

Built and operated a production messaging SaaS that connects a Laravel multi-tenant control plane to independent WhatsApp and Telegram execution services. Supports queued delivery, retries, callbacks, dashboards, subscriptions, and Salla/Zid commerce workflows, processing **5,000+ real messages weekly**.

Warqah Store — E-commerce Backend & DevOps

Laravel · Redis · Queues · MySQL · CI/CD · Production Support

Own backend engineering and DevOps for a live e-commerce platform that has generated **EGP 21M+ in sales**, processed **100K+ orders**, and served **90K+ customers**. Work covers deployments, queue reliability, payment/shipping integrations, monitoring, incident recovery, migrations, rollback, and performance.

Smart Lockers Platform [🔗](#)

Laravel · Filament · Python · MQTT · Raspberry Pi · Redis · Webhooks

Designed and built a production multi-tenant control plane that separates business applications from locker hardware through secured APIs, queues, MQTT-connected Raspberry Pi agents, webhook callbacks, command-state tracking, retries, diagnostics, and recovery workflows.

Education

Bachelor's degree in Computer & Artificial Intelligence

Faculty of Computers and Artificial Intelligence, University of Sadat City

Sep 2021 – Aug 2025

Sadat City, Egypt

- Excellent with Honors — cumulative GPA **3.47/4.0**.
- Final-year GPA: **3.8/4.0**.
- Graduation Project: Virtual Clinic / Dr. Robot — **A+**.

Certificates

- ICSI | CNSS Certified Network Security Specialist [🔗](#)
- Udacity / MCIT — Intro to Programming Nanodegre [🔗](#)
- Cyber Security Foundation Professional Certificate - CSFPC™ [🔗](#)
- AWS Academy Cloud Foundations [🔗](#)
