Abdalrhman M. Alkady

Software Engineer | Full Stack Developer | Laravel & PHP Expert | AI
& SaaS Solutions

El Obour, Al Qalyubiyah, Egypt

Summary

I thrive on the challenge of building scalable solutions that make life easier for businesses and their customers. As a full-stack developer with a strong foundation in Laravel and PHP, I've spent years crafting high-performance backend systems and API-driven products that tackle real-world problems. My journey has taken me from developing multi-tenant architectures to optimizing performance for various SaaS platforms. At Mohssilh in Riyadh, I've had the pleasure of contributing to an accounting platform that supports over 200+ merchants and processes more than 20,000+ orders each month—totaling over 12M+ SAR! This experience taught me the importance of creating solutions that not only function well but also scale seamlessly as user demand increases. Before my time at Mohssilh, I worked at Theqah company, where I developed AI-powered applications that boosted system efficiency by 40%. Leading the development of RESTful APIs enabled me to delve deeply into cloud-based solutions, ensuring they could handle high traffic without issue. It's rewarding to see how these technologies can transform operations for businesses. I also enjoy freelancing on Upwork, where I've earned a reputation as a top-rated developer specializing in advanced AI integrations like OCR and predictive models. Completing over 10+ projects with an average rating of 5 stars has been incredibly fulfilling—it's great to know my work makes a difference for clients around the globe. Outside of coding, I'm passionate about continuous learning and sharing knowledge with others. Whether it's through mentoring aspiring developers or engaging in community tech events, I believe in giving back to the tech community that has supported me throughout my career. If you're looking for someone who can help bring your software ideas to life or collaborate on innovative projects involving SaaS or AI solutions, feel free to reach out via email! Let's connect!

Experience

Mohssilh

Backend Engineer

January 2025 - Present (1 year 7 months)

Riyadh, Saudi Arabia

Mohssilh is an accounting and payment management SaaS platform for Salla merchants, serving 200+ merchants and processing 20,000+ monthly orders worth 12M+ SAR.

Legacy System Optimization:

- Resolved critical Salla API integration issues affecting order sync and webhooks
- Eliminated performance bottlenecks causing crashes, memory issues, and slow response times
- Optimized database queries, reducing report generation from minutes to milliseconds (99%+ improvement)
- Stabilized production handling 20K+ orders monthly with zero downtime

Multi-Tenant SaaS Platform (v2) - Ground-Up Development: Architected and developed scalable multi-tenant platform from scratch:

- Built multi-database tenancy architecture with complete data isolation per merchant
- Implemented Laravel Octane + Swoole, improving API response times by 70-80%
- Designed event-driven architecture for real-time webhook processing (95%+ faster)
- Developed microservices architecture with shared kernel • Containerized entire stack using Docker

Key Features:

- Salla OAuth 2.0 integration with auto-refresh and intelligent reconnection
- Enterprise webhook processing for orders, products, coupons in real-time
- Complex billing calculation engine supporting multiple payment methods
- Scalable batch job system using Horizon for syncing 700+ orders per operation

Technical Solutions:

- Solved race conditions using locks and idempotency patterns
- Built fault-tolerant, resumable sync operations with automatic retry
- Designed timeout handling for long-running jobs with queue management

- Created seamless legacy data migration for zero-downtime transitions
- Developed internal admin tools using Filament

Technologies: Laravel 11, Octane, Swoole, Horizon, Redis, MySQL, Docker, Filament, Laravel Tenancy, OAuth 2.0

Impact: 70-80% faster APIs • 95%+ webhook improvement • 99%+ query optimization • 200+ merchants • 12M+ SAR monthly

Phoenix Tech's

Full Stack Developer | SaaS, AI, Cloud & API Engineering

September 2020 - Present (5 years 11 months)

Banha, Al Qalyubiyah, Egypt

- Developed scalable SaaS platforms and AI-powered applications, improving system efficiency by 40%.
- Engineered RESTful APIs and cloud-based solutions, handling high-traffic processing and automation.
- Led the development and deployment of multiple software products, ensuring high availability and security.
- Integrated payment gateways, authentication systems, and cloud infrastructure (AWS, Firebase, DigitalOcean).
- Optimized backend architecture, reducing server response times by 35% and enhancing user experience.

شركة موقع الثقة

Full Stack Developer | SaaS, AI & Payment Systems

August 2024 - Present (2 years)

Riyadh, Saudi Arabia

- Designed and built scalable APIs for a multi-tenant SaaS serving 200+ schools, ensuring secure and efficient transactions.
- Developed AI-powered face recognition payments using AWS Rekognition, reducing checkout time by 60%.
- Engineered POS systems and real-time dashboards, enabling canteen operators to track sales, inventory, and performance.
- Integrated payment solutions (Stripe, Twilio, OurSMS) to process 5,000+ secure daily transactions with 99.9% uptime.
- Optimized backend performance, reducing server response times by 30% and improving system reliability under heavy load.

upwork

Freelance Full Stack Developer

August 2023 - Present (3 years)

- Top Rated freelancer delivering advanced AI integrations (OCR, predictive models).
- Completed 10+ projects with an average 5-star rating; specialized in Laravel, Vue.js, React.js.
- Implemented CI/CD pipelines and Docker for rapid, reliable deployments on AWS/GCP.

Marqity Agency

Full Stack Developer | Laravel, API & E-Commerce Solutions

February 2024 - December 2024 (11 months)

Cairo, Egypt

- Developed custom e-commerce platforms and web applications using Laravel, Vue.js, and Tailwind CSS.
- Designed and optimized RESTful APIs, improving data exchange and system scalability.
- Integrated secure payment gateways (Stripe, PayPal) and automated checkout processes for client stores.
- Enhanced website performance, reducing load times by 30% and improving user engagement.
- Worked closely with clients to deliver customized SaaS solutions and improve business workflows.

Tjar.sa

Full Stack Developer

March 2024 - May 2024 (3 months)

Saudi Arabia

- Developed and maintained Tjar.sa's multi-tenant SaaS e-commerce platform.
- Built scalable and user-friendly solutions using Laravel & Livewire.
- Enhanced store management, inventory control, and payment processing features.
- Integrated secure payment gateways & marketing tools to support merchants.
- Worked closely with cross-functional teams to improve merchant success & user experience.

KLLIQ LLC

Full Stack Developer

September 2023 - March 2024 (7 months)

'Asir, Saudi Arabia

- Lead the design, development, and deployment of scalable web applications, ensuring a seamless user experience.
- Collaborate with cross-functional teams to integrate mobile apps through robust APIs.
- Harness the power of AI models to drive innovation, optimize performance, and create data-driven solutions for diverse company projects.
- Stay at the forefront of emerging technologies and industry trends to ensure KLLIQ LLC remains ahead in the digital landscape.

Maryzad - ماري زاد

Technical Support Specialist

July 2023 - October 2023 (4 months)

Qesm El Zamalek, Cairo, Egypt

As a Technical Support Specialist at Maryzad Company, I am responsible for the management and maintenance of the company's servers, email system, and websites. My role involves ensuring the smooth operation and optimal performance of these systems through troubleshooting and proactive maintenance. By leveraging my expertise, I contribute to the efficient and reliable functioning of the organization's technology infrastructure.

Intsolutions

Full Stack Developer

April 2023 - September 2023 (6 months)

Giza, Al Jizah, Egypt

- Revamped logistics infrastructure, reducing processing time by 40% and increasing operational efficiency.
- Standardized code review practices, improving code quality by 30% and fostering seamless team collaboration.

EraaSoft

Full Stack Developer

February 2023 - April 2023 (3 months)

Dokki, Giza

During my two-month internship as a Full-Stack engineer at Eraasoft, I had the opportunity to work on various projects and gain hands-on experience with the latest web development technologies. I worked under the guidance

of experienced senior engineers and collaborated with other members of the development team to design and implement software solutions.

One of my main tasks during the internship was to develop and maintain the company's web-based applications using PHP, Laravel, and MySQL. I also participated in code reviews, testing, and debugging of the applications, ensuring that they met the company's high standards for quality and performance.

In addition to the technical work, I had the opportunity to attend team meetings, participate in discussions about project requirements, and learn about the company's development processes and tools. The internship provided me with valuable experience that helped me develop my skills as a back-end engineer and prepared me for future career opportunities in the field.

Obour STEM School

3 years 1 month

Information Technology Supervisor

September 2018 - September 2021 (3 years 1 month)

Cairo, Egypt

manufacturing the school infrastructure and network. Helped Grade 10 students at the summer camp to prepare them to use the laptops and the school System & Network.

Chief Technology Officer

September 2018 - August 2021 (3 years)

Cairo, Egypt

IYNA Obour Chapter

Head Of Information Technology

July 2020 - May 2021 (11 months)

El Obour, Al Qalyubiyah, Egypt

TedxYouth@Ismailia STEM

Member Of Technical Staff

June 2020 - May 2021 (1 year)

Ismailia, Al Isma'iliyah, Egypt

Mediomena

Head Web Development Committee

April 2020 - May 2021 (1 year 2 months)

Cairo, Egypt

Ignite Talks

Graphic Designer

March 2020 - May 2021 (1 year 3 months)

Roboticers

Instructor

February 2020 - May 2021 (1 year 4 months)

Cairo, Egypt

Education

Faculty of Computers and Artificial Intelligence - Sadat City

Bachelor's degree, Computer Science · (September 2021 - July 2025)

STEM High School for Boys - 6th of October
